Canada Business Summary

This database contains the Canada Business Summary tables for each level of Canadian geography. With over 100 variables, each table represents counts of businesses in Canada by 2-digit (US) SIC code for all levels of geography. Other variables include information such as total number of businesses, employees, sales and years in yellow pages. All data are based on the Canadian Business Points database which contains the unit record level information on businesses in Canada.

The Canada Business Summary data is compiled from more than 300 telephone directories, government data sources, business magazines, newsletters and newspapers. Over 1.3 million Canadian businesses were geocoded and then summarized by standard census areas and postal FSAs. Use Canada Business Summary to understand the number and type of businesses within a geographic area.

Sources of Information

InfoCanada Business File, October 2010. Geographic attributes were added by Pitney Bowes Software Canada.

Updates

Pitney Bowes Software Canada updates the Canada Business Summary database annually in January.
