Encom Discover 11.1 Released

Encom Discover V 11.1, released for download in June, features fixes, an improved user guide and interface along with new tools.

- Drillhole cross sections can be now be defined along a non-linear path
- New function for drill project session management
- New downhole data display tool
- Improved section manager
- Raster handling for large grid formats and LIDAR data conversion
- Enhanced function of drillhole module,
- Improved grid support for large grids and more formats
- New command search tool
- Direct link to the Encom knowledge base
- Hydrology toolbox
- Create registered raster tool and more

Discover 11.1 requires MapInfo Professional 8.5 or newer. After the patch, operation on Windows 7 is supported for MapInfo 10.1 and is already supported for Discover 11 and Discover 3D 5.0. [More...](#)

Upgrades and new license purchases for MapInfo Professional Version 10.0.

In case you do not recall your summer email from us, the new release of MapInfo Professional 10.0 includes MATS (Maintenance & Technical Support).

Clients with current support receive MapInfo upgrades sent directly from Pitney Bowes. [Make sure we have your current address!](#) Preview MapInfo Professional Version 10.0: [MapInfo 10.0 Preview](#)

Online MapInfo Professional and Encom Discover Webinars and Courses for Geologists and GIS Professionals

Maximize your time and software investment through training designed to provide geologists and GIS professionals with an overview of product capabilities and features. The courses consist of lectures using geological data to build maps and visualize data.

An option to purchase a recording of classes is available to those who attend online courses. Online Topic: [Scaled Output Webinar](#). You will find webinars for the Geochem Module, Advanced Object Creation, Advanced Scaled Output, and Selecting & Querying Data. Classroom topics are listed on our website for Roundup and PDAC 2010 Conferences, sign up soon! [Training Schedule](#). If you do not see your course listed, please send your requests.

Course enrolment is limited so

Take advantage of your upgrade to Discover 11.1 and install the patch!

Encom Discover 3D 5.0.63 Released

User interface improvements and advancing functionality top the list of the latest developments for Encom Discover 3D V 5.0.63. Developments include:

- Drill Planner Tool can now plan drilling to a target in 3-dimensions
- Gridding Tool grids smooth surfaces from points and polygons helping to model subsurface features that appear more realistic than wireframe models
- Solid Generator Tool can now create a solid between surfaces
- Addition of advanced 3D drawing and editing tools and improved snapping and clipping make 3D editing easy
